Reg.No Maha/16082/07/F-15953/Latur

XII Science Teaching Program
Plan
2015/16

### Subject

Physics I

Chapter	Title	<b>Periods</b>
Chapter I	Circular Motion	20
1.1	Angular displacement	
1.2	Angular velocity and angular acceleration	
1.3	Relation between linear velocity and angular velocity	
1.4	Uniform circular motion (U.C.M):	
1.5	Acceleration in uniform circular motion	
1.6	Centripetal and centrifugal forces:	
1.7	Banking of roads:	
1.8	Vertical circular motion due to earths gravitation:	
1.9	Equation for velocity and energy at different positions	
1.10	Kinematical Equations for circular motion in analogy	

Chapter	Title	Periods
Chapter 2	Gravitation	16
2.1	Newton's law of gravitation:	
2.2	Projection of a satellite:	
2.3	Periodic time of a satellite	
2.4	Kepler`s laws of motion	
2.5	Binding energy and escape velocity of a satellite	
2.6	Weightlessness condition in a satellite	
2.7	Variation of 'g' due to altitude, latitude and depth:	
2.8	Communication satellite and uses of satellites:	

Chapter	Title	Periods
Chapter 3	Rotational motion	20
3.1	Moment of inertia:	
3.2	Kinetic energy of a rotating body	
3.3	Physical significance of moment of inertia:	
3.4	Radius of Gyration:	
3.5	Torque acting on a rotating body	
3.6	Rolling motion:	
3.7	Theorem of parallel and perpendicular axes:	
3.8	Applications - Rod, ring, disc, solid cylinder	
3.9	Angular momentum and its conservation:	

Chapter	Title	Periods
Chapter 4	Oscillations	24
4.1	Explanation of periodic motion:	
4.2	Liner simple harmonic motion:	
4.3	Differential equation of linear S.H.M	
4.4	S.H.M as projection of U.C.M along any diameter:	
4.5	Phase of S.H.M:	
4.6	Kinetic energy and potential energy of a particle	
4.7	Composition of two S.H.Ms having same period	
4.8	Simple Pendulum	
4.9	Damped oscillations:	

Chapter	Title	Periods
Chapter 5	Elasticity	15
5.1	General explanation of elastic property and elasticity:	
5.2	Plasticity	
5.3	Deformation:	
5.4	Definition of stress and strain:	
5.5	Hooke's law:	
5.6	Elastic constants:	
5.7	Determination of young's modulus of material of wire:	
5.8	Behaviour of metal wire under increasing load:	
5.9	Application of elastic behaviour of materials:	

Chapter	Title	Periods
Chapter 6	Surface tension	15
6.1	Surface tension on the basis of molecular theory:	
6.2	Surface energy:	
6.3	Surface tension:	
6.4	Angle of contact:	
6.5	Capillarity and capillary action:	
6.6	Effect of impurities and temperature on surface tension	

Chapter	Title	Periods
Chapter 7	Wave motion	14
7.1	Simple harmonic progressive wave:	
7.2	Reflection of transverse and longitudinal waves:	
7.3	Change of phase:	
7.4	Superposition of waves:	
7.5	Formation of beats:	
7.6	Doppler effect in sound:	

Chapter	Title	Periods
Chapter 8	Stationary waves	16
8.1	Study of vibrations in a finite medium:	
8.2	Formation of beats:	
8.3	Study of vibration of air column:	
8.4	Free and forced vibrations:	
8.5	Resonance:	

Chapter	Title	Periods
Chapter 9	Kinetic theory of gases and radiation	20
9.1	Concept of an ideal gas:	
9.2	Assumptions of kinetic theory of gases:	
9.3	Mean free path()	
9.4	Derivation for the pressure of a gas:	
9.5	Derivation of bole's law:	
9.6	Maxwell distribution:	
9.7	Degrees of freedom and law of Equipartition of energy :	
9.8	Application of specific heat capacities of gases:	
9.9	Thermodynamics:	
		Cont

Chapter	Title	Periods
Chapter 9	Kinetic theory of gases and radiation	20
9.10	Absorption. Reflection and transmission of heat radiation:	
9.11	Perfectly black body:	
9.12	Spectrum of black body radiation in terms of wavelength:	
9.13	Emissive power and absorptive power:	
9.14	Kirchhoff's law of radiation and theoretical proof:	
9.15	Stefan's law of radiation:	
9.16	Newton's law of cooling:	

### Subject

Physics II

Physics II

Chapter	Title	Periods
Chapter 10	Wave theory of light	16
10.1	Wave theory of light:	
10.2	Wave front and wave normal:	
10.3	Huygens' principle:	
10.4	Construction of plane and spherical wave front:	
10.5	Reflection at a plane surface	
10.6	Refraction of a plane wave front at a plane surface:	
10.7	Polarization:	
10.8	Plane polarized light:	
10.9	Brewster's law:	
10.10	Polaroid:	
10.11	Doppler effect in light:	

Chapter	Title	Periods
Chapter II	Interference and diffraction	20
11.1	Interference of light:	
11.2	Conditions for producing steady interference pattern:	
11.3	Young's experiment:	
11.4	Analytical treatment of interference bands:	
11.5	Measurement of wavelength by biprism experiment:	
11.6	Diffraction due to a single slit:	
11.7	Rayleigh's criterion:	
11.8	Resolving power of microscope and telescope:	
11.9	Difference between interference and diffraction:	

Physics II

Chapter	Title	Periods
Chapter 12	Electrostatics	20
12.1	Gauss' theorem:	
12.2	Mechanical force acting on unit area of a charged conductor:	
12.3	Energy density of a medium:	
12.4	Dielectrics and polarization:	
12.5	Concept of capacitor:	
12.6	Capacity of a parallel plate capacitor:	
12.7	Effect of dielectrics on capacity:	
12.8	Energy of a charged capacitor:	
12.9	Capacitors in series and parallel:	
12.10	Van de Graff generator:	

Physics II

Chapter	Title	Periods
Chapter 13	Current electricity	15
13.1	Kirchhoff's laws:	
13.2	Whetstone's network:	
13.3	Meter-bridge	
13.4	Potentiometer:	
Chapter 14	Magnetic effect of electric current	18
14.1	Ampere's law and its applications:	
14.2	Moving coil galvanometer (M.C.G) :	
14.3	Ammeter:	
14.4	Voltmeter:	
14.5	Sensitivity and accuracy of a moving coil galvanometer:	
14.6	Cyclotron	

Chapter	Title	Periods
Chapter 15	Magnetism	12
15.1	Circular current loop as a magnetic dipole:	
15.2	Magnetic dipole moment of a revolving electron:	
15.3	Magnetization and magnetic intensity:	
15.4	Diamagnetism, paramagnetism and ferromagnetism on the basis of domain theory:	
15.5	Curie temperature:	

#### Physics II

Chapter	Title	<b>Periods</b>
Chapter 16	Electromagnetic induction	24
16.1	Laws of electromagnetic induction:	
16.2	Eddy currents:	
16.3	Self and mutual induction:	
16.4	Displacement current:	
16.5	Transformer:	
16.6	Coil rotating in uniform magnetic induction:	
16.7	Alternating current:	
16.8	Reactance and impedance:	
16.9	L.C. oscillations:	
16.10	Power in A.C. circuit with (I) resistor (II) inductor	
16.11	Resonant circuits:	

Physics II

Chapte	er Title	Periods
Chapter	17 Electrons and photons	10
17.1	Photoelectric effect:	
17.2	Einstein's photoelectric equation:	
17.3	Photoelectric cell and its application:	
17.4	Particle nature of light : the photon	
Chapter	18 Atoms, molecules and nuclei	16
18.1	Geiger-Marsden experiment:	
18.2	Rutherford's model of atom:	
18.3	Bohr model:	
18.4	Hydrogen spectrum:	
18.5	Composition and size of nucleus:	
18.6	Radioactivity:	
18.7	de Broglie's hypothesis:	
18.8	Wavelength of an electron:	
18.9	Davisson and germen experiment:	

Chapter	Title	Periods
Chapter 19	Semiconductors	16
19.1	Energy bands in solids:	
19.2	Intrinsic and extrinsic semiconductors:	
19.3	P-type and N-type semiconductors:	
19.4	P-N junction diode	
19.5	Rectifiers	
19.6	Zener diode as a voltage regulator:	
19.7	Photo diode:	
19.8	Solar cell:	
19.9	Light emitting diode(LED):	
19.10	Transistor action and its characteristic:	
19.11	Transistor as a switch:	
19.12	Oscillators:	
19.13	Logic gates:	

Chapter	Title	Periods
Chapter 20	Communication systems	8
20.1	Elements of a communication system:	
20.2	Bandwidth of signals:	
20.3	Bandwidth of transmission medium:	
20.4	Need for modulation:	
20.5	Production and detection of amplitude modulated wave:	
20.6	Space communication:	
20.7	Propagation of electromagnetic waves in atmosphere:	

Subject

Chapter	Title	Periods
Chapter I	Solid state	10
1.1	Introduction	
1.2	Classification of solids	
1.3	Classification of crystalline solids	
1.4	Unit cell and two and three dimensional lattices	
1.5	Packing in solids	
1.6	Density of unit cells	
1.7	Packing in voids of ionic solids	
1.8	Defects in crystal structure	
1.9	Electrical properties	
1.10	Magnetic properties	

Chapter	Title	Periods
Chapter 2	Solutions and colligative properties	35
2.1	Introduction	
2.2	Types of solutions	
2.3	Concentrations of solution of solids in liquids	
2.4	Effect of change of temperature on solubility of gas	
2.5	Solid solutions	
2.6	Colligative properties	
2.7	Lowering of Vapour Pressure	
2.8	Boiling Point Elevation	
2.9	Freezing point Depression	
2.10	Osmosis and Osmotic Pressure	
2.11	Molecular Masses and Colligative Properties	
2.12	Abnormal Molecular Masses	
2.13	Van't Hoff factor	

Chapter	Title	Periods
Chapter 3	Chemical thermodynamics and Energetic	30
3.1	Introduction	
3.2	Basic concepts in thermodynamics	
3.3	Nature of heat and work	
3.4	Internal energy(U)	
3.5	First law thermodynamics	
3.6	Second law of thermodynamics	
3.7	Enthalpy (H)	
3.8	Enthalpies of physical changes	
3.9	Thermochemistry	
3.10	Spontaneous process (irreversible process)	
3.11	Third law of thermodynamics	

Chapter	Title	Periods
Chapter 4	Electrochemistry	35
4.1	Introduction	
4.2	Redox reactions	
4.3	Conductance in electrolytic solutions	
4.4	Electrochemical cells	
4.5	Electrolytic cells	
4.6	Galvanic or voltaic cells	
4.7	Electrode potentials and cell potentials	
4.8	Reference electrode	
4.9	Common types of cells	
4.10	Fuel cells	
4.11	Electrochemical series (Electromotive series)	

Chapter	Title	Periods
Chapter 5	Chemical kinetics	10
5.1	Introduction	
5.2	Rate of reaction	
5.3	Dependence of rate on reactant concentrations	
5.4	Molecularity of elementary reactions	
5.5	Collision theory and activation energy	
5.6	Temperature dependence of reaction rates (Arrhenius equation)	

Chapter	Title	Periods
Chapter 6	General principles and processes of isolation of Elements	10
6.1	Introduction	
6.2	Concentration	
6.3	Oxidation-reduction extraction of crude metal from concentrated ore	
6.4	Refining of crude metals	
6.5	Extraction of zinc from zinc blende	
6.6	Extraction of iron from haematite	
6.7	Extraction of aluminum from bauxite	
6.8	Extraction of copper from copper pyrites	

Chapter	Title	Periods
Chapter 7	p - Block elements	20
7.1	Introduction	
7.2	General introduction	
7.3	Group 16 elements	
7.4	Group 17 elements (halogen family)	
7.5	Group 18 elements (Noble gases)	
	7.1 7.2 7.3 7.4	Chapter 7 p - Block elements  7.1 Introduction  7.2 General introduction  7.3 Group 16 elements  7.4 Group 17 elements (halogen family)

### Subject Chemistry II

Chapter	Title	Periods
Chapter 8	d and f - block elements	15
8.1	General introduction and electronic configuration	
8.2	Occurrences, general characteristics of transition elements	
8.3	General trends in properties of first row elements	
8.4	Preparation and properties of k2Cr2O7 and KMnO4	
8.5	Introduction	
8.6	Oxidation states	
8.7	Lanthanoid contraction and its consequences	
8.8	Actinoids	
8.9	Oxidation states of Actinoids	
8.10	Comparison between lanthanoids and Actinoids	

Chapter	Title	Periods
Chapter 9	Coordination compounds	18
9.1	Introduction	
9.2	Ligands	
9.3	Coordination number: ligancy (CN)	
9.4	Characteristics of complex ions	
9.5	Sidgwick' s electronic theory	
9.6	Effective atomic number (EAN)	
9.7	IUPAC Nomenclature of mono nuclear coordination compounds	
9.8	Isomerism in coordination compounds	

Chapter	Title Periods
Chapter 10	Halogen derivatives of alkanes and arenes 31
10.1	Introduction
10.2	Classification
10.3	Monohalogen derivatives
10.4	Nomenclature of alkyl halides
10.5	Nature of C-X bond in alkyl halides
10.6	Preparation of alkyl halides
10.7	Physical properties and chemical reactions of alkyl
	halides
10.8	Nucleophilic substitution mechanism
10.9	Haloarenes
10.10	Nature of C-X bond
10.11	Preparation
10.12	Substitution reactions (Monosubstituted compounds
	only)
10.13	Chemical Reactions
10.14	Uses and environmental effects of some alkyl and aryl
10.14	halides

Chapter	Title	Periods
Chapter II	Alcohols, phenols and ethers	24
11.1	Introduction	
11.2	Alcohols	
11.3	PhenoIs	
11.4	Ethers	
Chapter 12	Aldehydes, Ketones and carboxylic acids	35
12.1	Introduction	
12.2	Structure of carbonyl functional group	
12.3	Aldehydes and ketones	
12.4	Carboxylic Acids	

Chapter	Title	Periods
Chapter 13	Compounds containing nitrogen	22
13.1	Nitro compounds	
13.2	Introduction	
13.3	Classification of amines	
13.4	Nomenclature of amines	
13.5	Methods of preparation of amines	
13.6	Physical properties of amines	
13.7	Reactions of amines	
13.8	Preparation of diazonium salts	
13.9	Reactions of diazonium salts	
13.10	Importance of diazonium salts	

Chemistry II

Chapter	Title	Periods
Chapter 14	Biomolecules	24
14.1	Introduction	
14.2	Carbohydrates	
14.3	Proteins	
14.4	Enzymes	
14.5	Lipids	
14.6	Hormones (Elementary idea)	
14.7	Vitamins	
14.8	Nucleic acids	

# CHHATRAPATI SHIVAJI SCIENCE JUNIOR COLLEGE LATUR Chemistry II

Chapter	Title	Periods
Chapter 15	Polymers	6
15.1	Introduction	
15.2	Classification	
15.3	Copolymerisation	
15.4	Chain growth or addition polymerization	
15.5	Preparation of some addition polymers: polythene, Polacrylonitrile, Teflon	
15.6	Step growth or condensation polymerisation	
15.7	Preparation of some step growth polymers: nylon-6. nylon 6,6 terylene bakelite melamine	
15.8	Nature rubber	
15.9	Vulcanization of rubber	
15.10	Preparation of synthetic rubbers: neoprene, Bune-S, Buna-N, butty 1 rubber	
15.11	Biodegradable polymers PHBV, dextron and nylon- 2nylon-6	

# CHHATRAPATI SHIVAJI SCIENCE JUNIOR COLLEGE LATUR Chemistry II

Chapter	Title	Periods
Chapter 16	6 Chemistry in everyday life	5
16.0	Prominent scientists	
16.1	Introduction	
16.2	Classification of drugs	
16.3	Chemical medicines	
16.4	Chemical in food	
16.5	Cleansing agents	

Subject

Biology

Chapter	Title	Periods
Chapter I	Genetic basis of inheritance	16
1.1	Mendelian inheritance	
1.2	Deviations from Mendelian rations	
Chapter 2	Gene: It's nature, Expression and Regulation	26
2.1	DNA : as a genetic material	
2.2	Modern concept of gene	
2.3	DNA: structure of eukaryotic DNA	
2.4	Semi-conservative replication of DNA	
2.5	Packaging of DNA	
2.6	RNA : General structure, types and functions	
2.7	Protein synthesis	
2.8	Gene expression and gene Ragulation	

Chapter	Title	Periods
Chapter 3	Biotechnology: process and application	16
3.1	Recombinant DNA technology	
3.2	Transposons, plasmids and bacteriophges	
3.3	Restriction fragments	
3.4	Preparing and cloning a DNA library	
3.5	Gene amplification (PCR)	
3.6	Application of biotechnology in agriculture - Bt crops	
3.7	Bio-safety issues	

#### Biology I

Chapter	Title	Periods
Chapter 4	Enhancement in Food production	14
<b>4</b> . I	Plant Breeding	
4.2	Tissue Culture	
4.3	Single cell protein	
Chapter 5	Microbes in human welfare	14
5.1	Microbes in Household Production	
5.2	Microbes in industrial Production	
5.3	Microbes in sewage treatment	
5.4	Microbes in biogas production	
5.5	Microbes as biocontrol agents	
5.6	Microbes as biovertilizers	

Chapter	Title	Periods
Chapter 6	Photosynthesis	28
6.1	Site of photosynthesis	
6.2	Photosynthetic pigments and their role.	
6.3	Light-Dependent reactions.	
6.4	Light-Independent reactions.	
6.5	Significance of photosynthesis	
6.6	Factors affecting photosynthesis	

Chapter	Title	Periods
Chapter 7	Respiration	20
7.1	ATP as currency of energy	
7.2	Mechanism of Aerobic and Anaerobic respiration and fermentation	
7.3	Respiratory Quotient (RQ)	
7.4	Significance of respiration	
Chapter 8	Reproduction in plants	20
8. I	Modes of reproduction (Asexual and sexual).	
8.2	Sexual reproduction	
8.3	Pollination: Types and agencies	
8.4	Double fertilization : Process and significance.	
8.5	Post fertilization changes.	

Chapter	Title	Periods
Chapter 9	Organisms and environment - I	10
9.1	Habitat and niche	
9.2	Ecosystem- pattern, components, productivity and decomposition	
9.3	Pyramids of number, biomass and energy.	
9.4	Nutrient cycles in ecosystems - carbon and phosphorous	
9.5	Ecological succession	
9.6	Ecological services- carbon fixation, pollination and oxygen release	
9.7	Environmental issues- effect of agrochemicals, solid waste management, greenhouse effect, global warming, ozone depletion, deforestation, case studies	

Subject

Biology II

Chapter	Title	Periods
Chapter 10	Origin. And evolution of life	15
10.1	Origin of life:	
10.2	Organic evolution:	
10.3	Origin and evolution of human being.	
Chapter II	Chromosomal basis of inheritance	16
11.1	The chromosomal theory	
11.2	Chromosomes	
11.3	Linkage and crossing over	
11.4	Sex-linked inheritance	
11.5	sex determination	
11.6	Mendelian disorders	
11.7	Chromosomal disorders	

Chapter	Title	Periods
Chapter 12	Genetic Engineering and Genomics	14
12.1	DNA fingerprinting	
12.2	Genomics and Human genome project	
12.3	Biotechnological applications for human health.	
Chapter 13	Human health and diseases	20
13.1	Concepts of immunology: types of immunity	
13.2	Structure of antibody, Antigen-antibody complex, antigens	
13.3	Pathogens & Parasites	
13.4	Cancer and AIDS	
13.5	Adolescence, drug and alcohol abuse	

Chapter	Title	Periods
Chapter 14	4 Animal husbandry	15
14.1	Management of farms and farm animals.	
14.2	Dairy	
14.3	Poultry	
14.4	Animal breeding	
14.5	Bee keeping	
14.6	Fisheries	
14.7	Sericulture	
14.8	Lac culture	

Chapter	Title	Periods
Chapter 15	Circulation	20
15.1	Blood composition and coagulation	
15.2	Structure and pumping action of heart	
15.3	Blood vessels	
15.4	Pulmonary and systemic circulation	
15.5	Heart beat and pulse	
15.6	Rhythmicity of heart beat	
15.7	Blood related disorders	
15.8	ECG, Pacemaker	
15.9	Lymphatic system	

Chapter	Title	Periods
Chapter 16	Excretion and Osmoregulation	18
16.1	Modes of excretion.	
16.2	Human excretory system	
16.3	Composition and formation of urine	
16.4	Role of kidney in osmoregulation	
16.5	Kidney failure, dialysis and kidney stone, transplantation	

Biology II

	Diology II	
Chapter	Title	Periods
Chapter 17	Control and co-ordination	35
17.1	Structure and functions of brain and spinal cord	
17.2	PNS and ANS	
17.3	Transmission of nerve impulse	
17.4	Reflex action	
17.5	Sensory receptors: Eye and Ear	
17.6	Endocrine glands and their hormones	
17.7	Hypothalamus	
17.8	Hormones as messengers and regulators	

Biology II

Chapter	Title	Periods
Chapter 18	3 Human Reproduction	30
18.1	Human male reproductive system	
18.2	Human female reproductive system	
18.3	Menstrual cycle	
18.4	Production of gametes	
18.5	Fertilization	
18.6	Embryonic development up to three germ layers	
18.7	Pregnancy, placenta, parturition and lactation,	
18.8	Reproductive health	

# Subject Subject Mathematics I

Chapter	Title	Periods
Chapter I	Mathematical logic	10
1.1	Statement	
1.2	Logical connectives, compound statement and truth tables	
1.3	Statement pattern and logical equivalence tautology, contradiction and contingency	
1.4	Quantifiers and quantified statements	
1.5	Duality	
1.6	Negation of compound statement	
1.7	Algebra of statements (Some standard equivalent statements)	
1.8	Application of logic to switching circuits	

Chapter	Title	Periods
Chapter 2	Matrices	15
2.1	Elementary transformations	
2.2	Inverse of a matrix	
2.3	Application of matrices	
Chapter 3	Trigonometric functions	25
3.1	Trigonometric equations and the solutions	
3.2	Solution of a triangle	
3.3	Inverse trigonometric functions	
3.4	Graphs of inverse trigonometric function	
3.5	Properties of inverse trigonometric function	

Chapter	Title	Periods
Chapter 4	Pair of straight lines	20
4.1	Combined equation of two lines	
4.2	Homogeneous equation of second degree	
4.3	Sum and product of slopes	
4.4	General second degree equation in x and y	
Chapter 5	Deleted By Board	
Chapter 6	Deleted By Board	
Chapter 7	Vectors	25
7.1	Collinearity and coplanarity	
7.2	Section Formula	
7.2 7.3	Section Formula Scalar triple product	

Chapter	Title	Periods
Chapter 8	Three dimensional geometry	10
8. I	Direction angles, direction cosines and direction ratios	
8.2	Angle between two lines	
Chapter 9	Line	10
9.1	Vector equation of a line	
9.2	Distance of a point from a line	
9.3	Skew lines	
Chapter 10	Plane	10
10.1	Equation of a plane	
10.2	Angle between the planes	
10.3	Coplanarity of two lines	
10.4	Distance of a point from a plane	

NA	- 41.	4!	
IYI	atr	nematics	

Chapter	Title	Periods
Chapter II	Linear programming	10
11.1	Converting business problems into mathematical formulation	
11.2	Areas in which linear programming can be applied	
11.3	Working rule to formulate LPP	
11.4	Terminologies related to the solution of LPP	
11.5	Solution of LPP by graphical method	
11.6	Special cases of LPP

Chapter	Title	Periods
Chapter 2	Differentiation	25
2.2	Relationship between continuity and differentiability	
2.3	Derivative of inverse functions	
2.4	Logarithmic differentiation	
2.5	Derivative of implicit functions	
2.6	Derivative of parametric functions	
2.7	Higher order derivatives	

Chapter	Title	Periods
Chapter 3	Applications of derivatives	18
3.1	Geometrical and physical meaning of derivative	
3.2	Derivative as a rate measure	
3.3	Approximation	
3.4	Rolle's theorem	
3.5	Increasing and decreasing functions	
3.6	Maxima and minima	

Chapter	Title	Periods
Chapter 4	Integration	25
4.1	Revision	
4.2	Integration by substitution	
4.3	Some special integrals	
4.4	Integration by parts	
4.5	Integration by partial fractions	

Chapter	Title	Periods
Chapter 5	Definite integral	18
5.1	Definite integral as limit of a sum.	
5.2	Fundamental theorem of integral calculus.	
5.3	Evaluation of definite integral by method of substitution	
5.4	Evaluation of a definite integral by rule of parts	
5.5	Evaluation of definite integral by partial fraction method.	
5.6	Properties of definite integral	
Chapter 6	Applications of definite integral	6
6.1	Area under the curve	

Chapter	Title	Periods
Chapter 7	Differential equations	12
7.1	Differential equation	
7.2	Formation of a differential equation	
7.3	Solution of differential equation	
7.4	Applications of differential equation	

Chapter	Title	Periods
Chapter 8	Deleted By Board	
Chapter 9	Probability distribution	10
9.1	Random variable (r.v.)	
9.2	Types of random variables	
9.3	Probability mass function	
9.4	Expected value, variance and standard deviation of a discrete random variable	
9.5	Probability density function and distribution function of a contin uous random variable	

Chapter	Title	Periods
Chapter 10	Binomial distribution	8
10.1	Bernoulli trial	
10.2	Binomial distribution	
10.3	Conditions for binominal distribution	
10.4	Mean and variance of binomial distribution
